

## Implementation

### How and where the AGOF seminars are conducted

Thanks to its central location near Frankfurt's main station, the AGOF Academy can be easily and conveniently reached by train, plane or car.

The seminars offered by the AGOF Academy are conducted either on fixed dates at the premises of the AGOF Academy or can be individually booked by date and location as an in-house event at the premises of the relevant company. In order to provide an effective seminar, in both cases the number of participants is limited to eight.

The training facilities at the AGOF Academy are equipped with modern technology and have room for up to eight participants. The participants can bring their own laptops with a working version of TOP installed. Alternatively, they can use the computers of the AGOF Academy on which the TOP program has already been installed.

If the seminar takes place in-house at the premises of a company, they will need to provide the computers as well as a digital projector and a flipchart.
